

CHS LIQUID AMS™

Ammonium Sulfate Solution

- A convenient liquid formulation of ammonium sulfate at a concentration of 3.4 lb/gal.
- Ammonium sulfate provides ammonium that can help improve uptake and translocation.
- Ammonium sulfate also provides sulfate that combines with salts in the spray solution (calcium, magnesium, iron, sodium, etc.) which prevents them from antagonizing glyphosate and other pesticides.

Principal Functioning Agents

Blend of nonionic surfactants, ammonium salts and buffering agents100%

Application Directions

Typical use rates for glufosinate is 3.5-7 pt/A

- 1.5-3 lb/A of ammonium sulfate

Typical use rate for glyphosate is 2.5 gal/100 gal of spray solution

- 2.5 gal provides 8.5 lb/100 gal of ammonium sulfate
- Rates can vary between 2.5-5 gal/100 gal of spray solution

Package Size

2x2.5 gallon case, 250 gallon tote, Bulk

Always read and follow label directions.
